

Change of Status, Program, Requirement, etc

College of Engineering & Applied Science

Name: Phillips, Scott

UC ID: M04130689

Address: 2551 Homestead Pl, Cincinnati, Ohio, 45211

Department: Department of Aerospace Engineering and Engineering Mechanics

Program: Doctor of Philosophy in AeroSpace Engineering

Advisor: Cohen, Kelly

Cell Phone#: 5138765869

E-Mail: phillis8@mail.uc.edu

EXAMPLES OF CHANGES (Be specific and detailed): FT/full-time, PT/part-time, W/withdrawal from the program, Program change Ph.D. from/to MS, Changes regarding class permission for any reason, etc.

I request: Request for BANA7020 to count as a math credit, since other, similar BANA courses are eligible. Description: An introduction to modeling, solving with state-of-the-art software, and interpreting the results for real-world linear, integer, and optimization under uncertainty applications. Solution techniques and analyses covered include graphical approaches, the simplex method, and sensitivity for linear optimization; branch-and-bound and cutting plane techniques for integer optimization; and two-stage stochastic programming and robust optimization for optimization under uncertainty. Upon completion of this course, students will be able to formulate real applications as mathematical problems, understanding the underlying assumptions, and the scalability/difficulty of the proposed models. -
